

OCN 479-001

Sensor/platform presentations

Today's plan

Presentations

Review issues from first lab

Complete second lab activity
(building off first)

What's the point of today's presentations?

1

Familiarize yourself
with cutting-edge
coastal technologies

2

Connect technology
with applications

3

Begin conversations
about key metrics (e.g.,
accuracy, precision,
stability, response time,
endurance/lifetime,
servicing intervals,
technical needs)

Presentation guidelines

Team up with two other people (for four teams of three people) and pick your favorite instrument in the OI Lab. Give a short (three to five minute presentation) in class on Sep. 8 on the following:

- What the instrument is

- What it can measure

- What studies it would likely be used for

- Important technical specifications (look up on website and/or product datasheets)

- Why you picked it

Your presentation should be no more than one or two slides which you will submit on Canvas (via the Assignment post).

PRESENTATION ORDER TBD...
